What Is A Robot?

A Robot is a piece of machinery that does things you would expect any human to do.

Where Did The Word Robot Come From?

The word robot came from the Czech word ROBOTNICK. An ancient name given to a serf or slave.

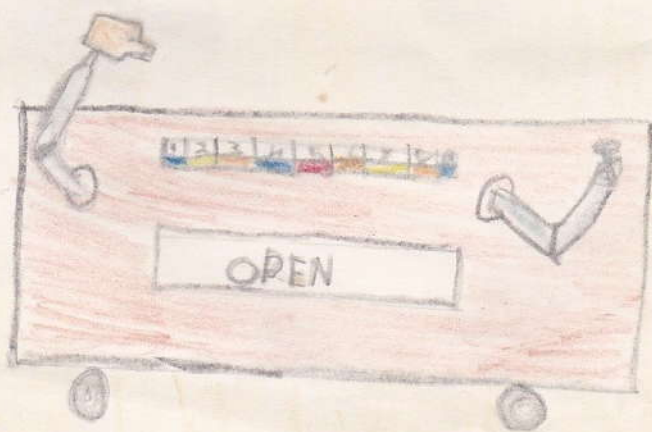

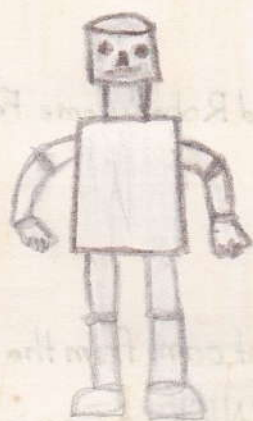

What is a Robot?

A Robot is a piece
of machinery
that you can
control.

What Does A Robot Look Like?

A robot does not look like a mechanical tin can that you see on a comic strip. Infact they bear little likeness to man.

How Does A Robot Work?

A robot works by someone typing a message through a computer. Or a cassette put in the robot.

What's a Robot Look Like?

A robot
manipulate
on a computer
little things to man,

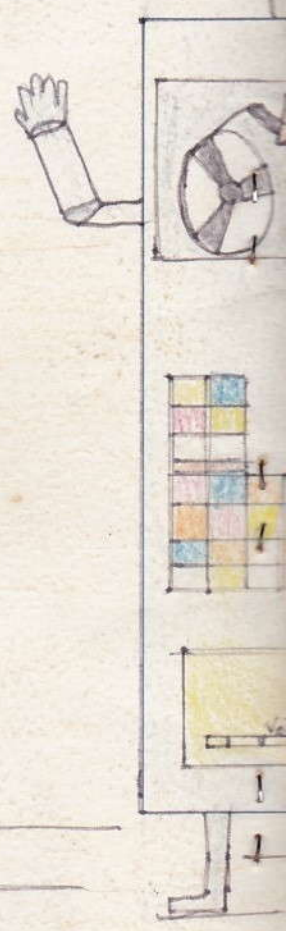

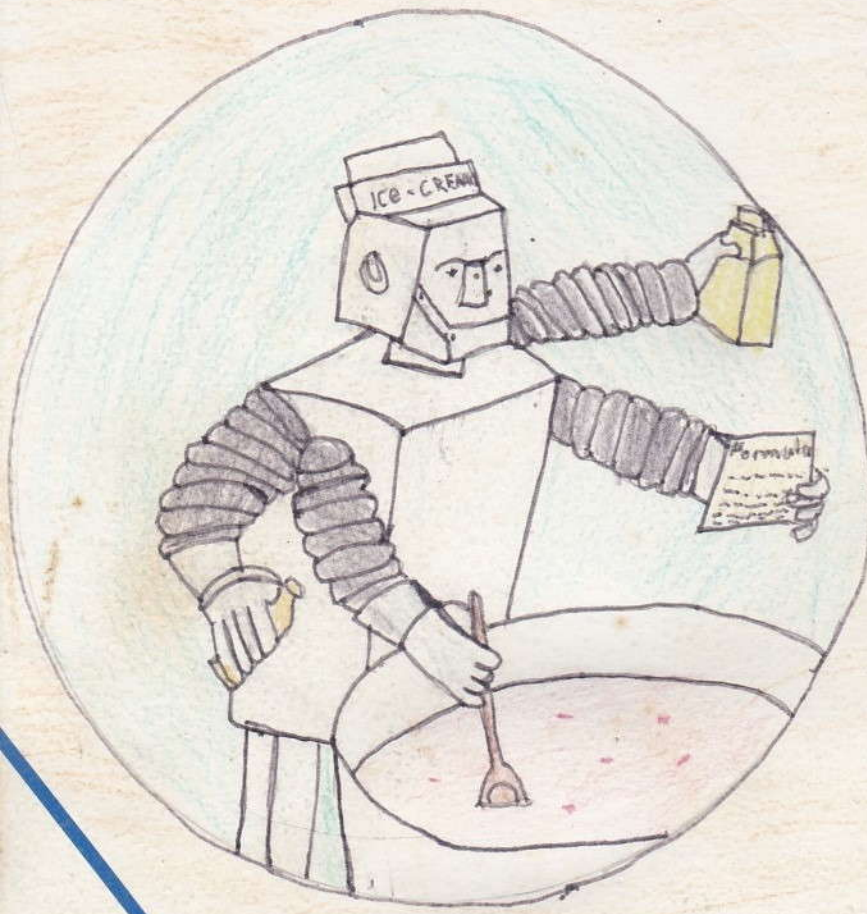

Because robots are so
sensitive nowadays, that instead
of them working for us. We might
be working for them.

How Does A Robot Work?

A robot works by someone typing
a message through a computer.
The computer puts in the robot.
